ZiPP Mannequins | 2005

A collection of three types of flat pack mannequins made using polypropelene and a unique zipping technique designed by the studio.

These mannequin's are perfect for new launch presentations and subsequent trade shows around the world saving precious logistic space and cost.

Designed for use in retail, they can be internally lit to create fantastic window displays.

The flat pack mannequins come in three sizes:

1. Bust (centre)
2. Waist (left)
3. Full length (right)

All three designed to fit over a hanger.

Mannequin's in situ at the deploy shop in a Pop up shop in New York 2005
