

## **Second Life!**

**We thought you would be interested to see that our mail-order packaging is re-cycled.**

**We found a company in Manchester who collect all the left-over cardboard packaging from major retailers like Argos and make new packaging designs and products with the cardboard.**

**The cardboard packaging has literally been given a second life!**

**That's why you'll notice graphics on the cardboard packaging that has nothing to do with the Arash and Kelly products you ordered. You'll see description for toasters, wine racks etc.**

**Each cardboard package is unique and different!**

**To see the process goto:**
